## Quality and distinction for your cacao drinks

Your cocoa drinks are special. They have their own distinct signature. Their own own distinct colour. Their own distinct flavour. For a century and a half, Royal Buisman has been providing the caramelised sugars that give cocoa drinks just that extra special touch -cost effectively. Adding our signature to yours.

NATURAL CARAMEL INGREDIENTS

## Better taste, lower cost

Caramelised sugars, provided by Royal Buisman in convenient powdered form, provide the final touch for instant cocoa drinks and chocolate milk, as well as for malt-based cocoa specialties, all with equal ease. Guaranteed free of e-numbers, our caramels significantly boost flavour profiles, taste intensities and other signature needs (including cost effectivity). Reducing the cocoa dosage with our natural sugar powders is an established path to success.

### The secret: caramelised sugars

Enhance cacao flavour.

Enhance chocolate flavour.

Warmer red/brown colour tones.

Less acidity, enhanced bitter tones.

Intensified taste, more creaminess and mouthfeel.

Natural, e-number free and so, cleaner labels.

All this with easy integration into your manufacturing processes.

Royal Buisman offer two options to achieve all this, and more.

- Natural Caramelised Sugars. These enhance a creamy, chocolate flavour to such an extent that up to 30% lower cocoa dosages (and corresponding cost savings) are feasible in

realising natural flavours with bitter tones for your signature products. The result: more body, more distinctive character.

- Traditional Caramelised Sugars are used to strengthen the natural cocoa flavour, to add roasted notes and to provide extra intensity in taste experiences.

Both are 100% pure caramelised sugars, requiring low dosages -which means high cost effectivity, as well as extra strong chocolate appeal.
