

**DEMONSTRATION** **RESEARCH** **SHARING KNOWLEDGE**

## DEMONSTRATION

On 5000 m<sup>2</sup> we have 23 participating companies who give insights in their latest technological innovations (logistics, lighting, water, climate, etc.) which are needed to set up a greenhouse. Everything that is needed for building a greenhouse can be found at Demokwekerij Westland.

## RESEARCH

We have 41 glasshouse compartments where different types of research are being conducted. These types can vary between climate, water, lighting, crop protection products, growing systems, fertilizers and many more aspects. The researches that are conducted are always practical and applicable for the parties involved.

## SHARING KNOWLEDGE

Through our active cooperation with the horticultural industry, we distribute knowledge through courses, education, presentations and open house days. The goal of this knowledge distribution is to continue developing the horticultural sector.
